प्रस्तावना

अनिगमित गैर-कृषि क्षेत्र भारतीय अर्थव्यवस्था में देश के सकल घरेलू उत्पाद में अपने योगदान और रोजगार पैदा करने में महत्वपूर्ण भूमिका निभाता है और इस प्रकार यह क्षेत्र प्रत्यक्ष या अप्रत्यक्ष रूप से जुड़ी एक बड़ी आबादी के जीवन को छूता है। यह क्षेत्र आपूर्तिकर्ताओं और सेवा प्रदाताओं के रूप में कार्य करके निगमित क्षेत्र का भी समर्थन करता है, जिससे आपूर्ति श्रृंखला का एक अभिन्न अंग बनता है।

इस क्षेत्र की आर्थिक और प्रचालनात्मक गतिशीलता को वास्तविक रूप से कैप्चर करने के लिए राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (NSSO) द्वारा राष्ट्रीय और राज्य स्तर पर विनिर्माण, व्यापार और अन्य सेवा क्षेत्र (निर्माण को छोड़कर) में अनिगमित गैर-कृषि स्थापनाओं की विभिन्न आर्थिक और प्रचालनात्मक विशेषताओं को विशेष रूप से मापने के लिए अनिगमित क्षेत्र उद्यमों (ASUSE) के वार्षिक सर्वेक्षण की संकल्पना की गई थी। ASUSE के आंकड़ों का उपयोग राष्ट्रीय लेखा सांख्यिकी के संकलन में किया जाना है। यह केंद्र और राज्य सरकारों के विभिन्न मंत्रालयों, नीति निर्माताओं, शोधकर्ताओं और अन्य हितधारकों को महत्वपूर्ण इनपुट भी प्रदान करेगा।

ASUSE का दूसरा पूर्ण सर्वेक्षण, जिसे 'ASUSE 2022-23' कहा जाता है, अक्टूबर, 2022 से सितम्बर, 2023 के दौरान किया गया था। सर्वेक्षण अभिकल्प एवं अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति और उपकरणों को विकसित किया और यह रिपोर्ट तैयार की। फील्ड कार्य क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किया गया था और समंक विधायन केंद्र (डीपीडी) ने डेटा प्रोसेसिंग और सारणीयन कार्य को संभाला था। सर्वेक्षण समन्वय प्रभाग (एससीडी) ने इस सर्वेक्षण की विभिन्न गतिविधियों का समन्वय किया।

मुझे इस विस्तृत रिपोर्ट को प्रकाशित करने में खुशी हो रही है, जो विभिन्न परिचालन और आर्थिक विशेषताओं से संबंधित प्रमुख संकेतकों के अनुमानों के माध्यम से अनिगमित गैर-कृषि अर्थव्यवस्था (निर्माण को छोड़कर) के बारे में गहरी अंतर्दृष्टि और परिप्रेक्ष्य प्रदान करती है।

मैं स्टैंडिंग कमिटी ऑफ स्टेटिस्टिक्स (SCoS) के अध्यक्ष डॉ. प्रणव सेन और अन्य सदस्यों की आभारी हूँ कि उन्होंने इस सर्वेक्षण पर अपने विभिन्न इनपुट, मार्गदर्शन आदि प्रदान किए। मैं उन सभी स्थापनाओं की भी सराहना करती हूँ जिन्होंने इस सर्वेक्षण के लिए आंकड़े एकत्र करने में फील्ड अधिकारियों को अत्यधिक सहयोग दिया है। मैं ASUSE 2022-23 के संचालन और इस रिपोर्ट को प्रकाशित करने के लिए NSSO के विभिन्न प्रभागों के अधिकारियों/कर्मचारियों द्वारा किए गए प्रयासों की भी सराहना करना चाहती हूँ। रिपोर्ट की सामग्री में सुधार के लिए सुझावों का स्वागत है।

Preface

The unincorporated non-agricultural sector plays a pivotal role in Indian economy in terms of its contribution to the Gross Domestic Product of the country and also for its ability to generate employment and thus touching the lives of a huge population directly or indirectly associated with this sector. The sector also supports the incorporated sector by acting as suppliers and service providers, thereby forming an integral part of the supply chain.

In order to realistically capture economic and operational dynamics of this sector, Annual Survey of Unincorporated Sector Enterprises (ASUSE) was conceptualized by National Sample Survey Office (NSSO) for exclusively measuring various economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sector (excluding construction) at national as well as at state level. Data from ASUSE is to be used in compilation of National Accounts Statistics. It will also provide important input to various ministries in the central and state governments, policy makers, researchers and other stake holders.

The second full-fledged survey of ASUSE, referred to as 'ASUSE 2022-23' was carried out during October, 2022 to September, 2023. The Survey Design and Research Division (SDRD) developed the survey methodology and instruments and prepared this report. The field work was carried out by the Field Operations Division (FOD) and the Data Processing Division (DPD) handled the data processing and tabulation work. The Survey Coordination Division (SCD) coordinated various activities of this survey.

I am happy to bring out this detailed report, which provides deep insight and perspective about unincorporated non-agricultural economy (excluding construction) through estimates of key indicators pertaining to various operational and economic characteristics.

I am thankful to Dr. Pronab Sen, Chairman, and other members of the Standing Committee of Statistics (SCoS) for providing their various inputs, guidance, etc. on this survey. I also record my appreciation for all the establishments that had extended utmost co-operation to the field officers in collecting the data for this survey. I would also like to appreciate the efforts made by the officers/officials of different divisions of NSSO for conduct of ASUSE 2022-23 and bringing out this report. Suggestions for improving the content of the report are most welcome.

Chapter One

Introduction

1.1 Background:

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MoSPI), Government of India, since its inception has been conducting nation-wide large scale sample surveys, employing scientific sampling methods, to collect data on diverse socio-economic aspects. The role of unincorporated enterprises in the Indian economy is very important and accordingly, a need was felt to design an annual survey covering the unincorporated non-agricultural enterprises of the country. This necessitated NSSO to the development of Annual Survey of Unincorporated Sector Enterprises (ASUSE) for exclusively measuring various economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sector.

1.1.2 NSSO conducted the first full-fledged survey of ASUSE i.e. ASUSE 2021-22 during April, 2021-March, 2022. Thereafter, the next survey of ASUSE, i.e. ASUSE 2022-23 has been conducted during October, 2022 to September, 2023. Now, this report is being released showing the results of ASUSE 2022-23.

1.2 Objective of the Survey:

1.2.1 In Indian economy, unincorporated sector is important because of the large number of establishments in this sector and the magnitude of employment it provides to unskilled/ semi-skilled/ skilled persons, besides its contribution to Gross Domestic Product of the country. Broadly, this unincorporated sector also covers the informal sector enterprises¹. The necessity of comprehensive data pertaining to unincorporated sector including informal sector for planning and policy formulations thus needs no emphasis. The System of National Accounts 2008 (SNA 2008) has also acknowledged the difficulty in identifying the informal sector units properly. However, the basic features of this sector, in simple terms, is mainly characterised by factors such as (a) easy entry for the new enterprises, (b) family ownership of enterprises, (c) reliance on indigenous resources, (d) small-scale of operations and low productivity, (e) labour-intensive technology, etc. These units may operate without a fixed location, or in homes, small shops or workshops. The activities covered range from street vending, shoe shining and other activities that require little or no capital and skills to activities that involve a certain amount of investment or level of expertise such as tailoring, car repair and professional services. Many informal enterprises are operated by an individual working alone, as a self-employed entrepreneur (own-account worker), or with the help of unpaid family members, while other informal unincorporated enterprises may engage paid workers. The exact coverage of this sector is mentioned in paragraph 1.3.1.

1.2.2 ASUSE is devoted exclusively to economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sectors to supplement the corporate

¹ System of National Accounts, 2008: “*Chapter 25: Informal aspects of the economy*”, European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

sector data. This will help National Accounts Division (NAD) of MoSPI to compute important components of national accounts. Specially designed three-digit product codes used in the enterprise schedule of this round will help NAD also make use of the survey results in preparation of Supply-Use Table. The data collected in this survey will help in meeting the requirements of different Ministries, Organizations and users in general.

1.3 Survey Outline:

1.3.1 Coverage of the Survey:

1.3.1.1 **Geographically**, ASUSE 2022-23 covered the rural and urban areas of whole of India (except the villages in Andaman and Nicobar Islands which are difficult to access).

1.3.1.2 **Sector-wise**, unincorporated non-agricultural establishments belonging to three sectors viz., Manufacturing, Trade and Other Services has been covered in ASUSE 2022-23.

1.3.1.3 **Category-wise**, ASUSE 2022-23 covered the following:

- (a) Manufacturing establishments **excluding** those registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948.
- (b) Manufacturing establishments registered under Section 85 of Factories Act, 1948.
- (c) Establishments engaged in cotton ginning, cleaning and bailing (code 01632 of NIC-2008) **excluding** those registered under Factories Act, 1948.
- (d) Establishments manufacturing bidi and cigar **excluding** those registered under Bidi and Cigar Workers (Conditions of Employment) Act, 1966.
- (e) Non-captive electric power generation, transmission and distribution by units **not registered** with the Central Electricity Authority (CEA).
- (f) Trading establishments.
- (g) Other Service sector establishments.

1.3.1.4 **Ownership-wise**, establishments under coverage in (a) to (g) of para 1.3.1.3 consisted of:

- (a) Proprietary and partnership establishments [**excluding** Limited Liability Partnership (LLP) establishments]
- (b) Society/trust/association/club/body of individuals etc., Co-operatives, Self-Help Groups (SHGs), Non-Profit Institutions (NPI/NPISH), etc.

1.3.1.5 Following establishments were **excluded** from the coverage:

- (a) Establishments which are incorporated i.e. registered under Companies Act, 1956/ Companies Act, 2013
- (b) Manufacturing establishments and other non-manufacturing establishments covered under Annual Survey of Industries (ASI)
- (c) The electricity units registered with the Central Electricity Authority (CEA)

(d) Government Department/Government Company/Government Society/ Public Sector Unit.

1.3.1.6 Different activity categories that are used in this report are presented as Annexure I at the end of this chapter.

1.3.2 **Survey Design:** The survey has been conducted following a multi-stage stratified sampling scheme where first stage units (FSUs) are census villages in rural² and UFS (Urban Frame Survey) blocks in urban areas. The ultimate stage units (USU) were establishments for both the sectors. In the case of large FSUs, one intermediate stage of sampling has been done in the form of hamlet-groups in rural and sub-blocks in urban. The detail of sampling design followed in this survey has been placed in Appendix B of this report.

1.4 Operational and Economic Characteristics of ASUSE 2022-23:

1.4.1 Data on various operational and economic characteristics have been collected through the enterprise schedule³. These characteristics are very important and relevant for overall picture of the unincorporated sector. This report exclusively focuses on these operational and economic characteristics and provides a number of tabulations on their estimates. The estimates are generated using the survey-based multipliers for both 'aggregate' and 'ratio' estimates.

1.4.2 An establishment is treated as an enterprise or part of an enterprise, which is situated in a single location carrying out its productive activity. The enterprise and the establishment are the same for single-establishment entities. ASUSE survey is based on establishment approach and tries to capture the expenses, receipts, assets, loans, employment, etc. pertaining to the activities of the single location at which the establishment is located. However, it is pertinent to mention that it is very common in unincorporated sector to carry out multiple activities in the single location i.e., at the location of establishment. In such cases of multiple activities, if accounts are separable then the multiple activities, although in a single location, are listed as separate establishments. It ensures establishment approach is followed not only at location but also at activity level which further fine tunes the approach itself. Cases, where accounts of different activities are not separable, are treated as mixed activities of an establishment. Thus, by 'establishment approach' we mean an enterprise is engaged in single activity or mixed activity at the single location of the enterprise.

1.5 Contents of this document

1.5.1 All the estimates presented in this report are based on data collected through ESU Schedule of ASUSE 2022-23.

1.5.2 This report contains three chapters and three appendices. Following the present introductory chapter (Chapter One), 'Chapter Two' outlines the concepts and definitions of different terms used in this survey. Chapter Three presents summary of findings of the survey at the National, State/UT as well as at activity

² In general, the census villages are the FSUs in the rural sector. However, for rural part of Kerala, Panchayat wards has been taken as FSUs.

³ The 'establishment approach' has been followed for this survey.

level. Detailed tables forming the basis of this report have been provided at Appendix A. Appendix B provides the sampling design and estimation procedure used for estimating various parameters while Appendix C contains a copy of the ESU Schedule of ASUSE 2022-23.

1.5.3 While using the estimates for the Union Territories and smaller States, it may be kept in mind that the sample sizes for them may not be adequate enough for getting sufficiently reliable estimates and interpretation thereof should be made with caution. Similarly, while interpreting the results using estimates at much deeper cross-sectional level, data users must keep in mind the inadequacy, if any, of the corresponding domain specific samples before arriving at any conclusion. Additionally, in ASUSE 2022-23, in view of the merger of the Union Territories of Daman & Diu and Dadra & Nagar Haveli into a single UT, the estimates pertaining to these two UTs have been presented as one single UT with the name 'D & N Haveli and Daman & Diu'.

1.5.4 The activities pursued by the establishments are broadly categorised into four (4) Broad Activity Categories (BAC). The different 'Broad Activity Categories' that were covered in ASUSE survey are 'manufacturing', 'non-captive electricity generation', 'trade' and 'other services'. There are many tables for State/UTs in 'Appendix A', where estimates for important indicators are presented at BAC level. 'Non-captive electricity generation' has not been displayed separately in these tables because of very low sample sizes. However, all-India values do contain the contribution of the 'Non-captive electricity generation' sector. Hence, the all-India values may not always match with the constituent values.

1.5.5 Many tables in 'Appendix A' are generated for different 'Activity Categories' under the BAC's, with notations M1, M2, M3,, T1, T2,....., S1, S2,....., etc. Users are requested to refer Annexure I at the end of this chapter for the composition and detailed description of these various activity categories.

1.5.6 Due to round-off issues also, all-India values may not always match with the sum of the values of the constituent items. Similarly, for tables showing per thousand distribution of any attribute, the sum of the individual rows may not add up to 1000, owing to the same reason.

Chapter Two

Concepts and Definitions

2. Concepts and Definitions:

2.1 Population coverage: The following rules regarding coverage of the population/households are adhered to while visiting households for the purpose of listing of households and establishments:

- (a) Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., are excluded, but residential staff there in are considered while listing is done in such institutions. The persons of the first category are considered as normal members of their parent households and have been considered there. Convicted prisoners undergoing sentence have been outside the coverage of the survey.
- (b) Floating population, i.e., persons without any normal residence are not to be considered. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, have been taken into account.
- (c) Foreign nationals are not considered, nor do their domestic servants, if by definition the latter belong to the foreign national's household.
- (d) Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) are kept outside the survey coverage due to difficulties in conducting survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, has been covered.
- (e) Establishments run by persons staying in orphanages, rescue homes, *ashrams*, vagrant houses, old-age homes, students staying in hostels and the residential staff (other than monks/ nuns) of these institutions have been considered.

2.2 House: Every structure, tent, shelter, etc. is a house irrespective of its use. It may be used for residential or non-residential purpose or both or even may be vacant.

2.3 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways but exclude temporary visitors and guests. The following procedures have been adopted as guidelines for identifying the composition of the household.

- (a) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., constitutes a single-member household. If, however, a group of persons among them normally pool their income for spending, they would together be treated as forming a single household. For example, a family living in a hotel is treated as a single household.
- (b) In deciding the composition of a household, more emphasis is placed on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case, the place of residence of a person is different from the place of boarding, he or she has been treated as a member of the household with whom he or she resides.

- (c) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) is considered as a member of the household with whom he or she resides even though he or she is not a member of the same family.
- (d) When a person sleeps in one place (say, in a shop or in a room in another house) but usually takes food with his or her family, he or she has been treated not as a single member household but as a member of the household in which other members of his or her family stay.
- (e) If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in hostel for studies or for any other reason), he/ she has not been considered as a member of his/ her parent's household. However, he/ she is considered as a single member household if the hostel is surveyed.

2.4 Enterprise: An institutional unit⁴ in its capacity as a producer of goods and services is known as an enterprise. An enterprise is an economic transactor with autonomy in respect of financial and investment decision-making, as well as authority and responsibility for allocating resources for the production of goods and services. It may be engaged in one or more economic activities at one or more locations. It may be noted that unincorporated enterprises owned by households, all of whose output is intended for final consumption or gross fixed capital formation by those households is outside the coverage of the definition of enterprises used in this survey.

2.5 Establishment: An establishment is an enterprise, or part of an enterprise, that is situated in a single location and in which either only a single productive activity is carried out or in which the principal productive activity accounts for most of the value added. The enterprise and the establishment are the same for single-establishment firms. The unit of enquiry of the ASUSE is an Establishment and not the Enterprise. ASUSE survey is based on establishment approach and tries to capture the expenses, receipts, assets, loans, employment, etc. pertaining to the activities of the single location at which the establishment is located. However, it is pertinent to mention that it is very common in unincorporated sector to carry out multiple activities in the single location i.e., at the location of establishment. In such cases of multiple activities, if accounts are separable then the multiple activities, although in a single location, are listed as separate establishments. It ensures establishment approach is followed not only at location but also at activity level which further fine-tunes the approach itself. Cases, where accounts of different activities are not separable, are treated as mixed activities of an establishment. Thus, by 'establishment approach' we mean an enterprise is engaged in single activity or mixed activity at the single location of the enterprise.

2.6 Non-agricultural establishment: All establishments covered under Sections 'C' to 'S' of NIC-2008 are "non-agricultural establishments". All non-agricultural establishments are referred to as NAE for this survey.

2.7 Unincorporated non-agricultural establishments: Non-agricultural establishments which are not incorporated (i.e. not registered either under Companies Act, 1956 or, Companies Act, 2013) are only covered. Further, the coverage of 'unincorporated establishments' is given in paragraph 1.3.1. The coverage is restricted primarily to all household proprietary and partnership establishments. In addition, society/trusts/associations/clubs/body of individuals etc., Co-operatives, Self-Help groups (SHGs) and Private Non-Profit Institutions (NPIs) including Non-Profit Institutions Serving Households (NPISH) are covered.

⁴ An institutional unit is an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities.

2.8 Manufacturing Establishment: A manufacturing establishment is a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. Also included are units primarily engaged in maintenance and repair of industrial, commercial and similar machinery & equipment, which are, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods. Thus, all activities covered by Divisions 10 to 33 of NIC 2008 have been considered as 'manufacturing' for the purpose of the survey. In addition, the activity of cotton ginning, cleaning and bailing (Code 01632 of NIC 2008) has been covered in the present survey under manufacturing. *It is important to note that production of goods for the sole purpose of domestic consumption has not been considered as manufacturing.*

2.9 Trading Establishment: A trading establishment is a unit engaged in trade. Trade is defined to be an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of the goods. Thus, all the trading activities, both wholesale and retail (perennial, casual or seasonal) listed under Divisions 45 to 47 of NIC 2008 are treated as trade. The activities of intermediaries who do not actually purchase or sell goods but only arrange their purchase and sale and earn remuneration by way of brokerage and commission are also treated as trade. Thus, purchase and sale agents, brokers listed in NIC 2008 Division, and auctioneers listed under NIC Group have also been under the survey coverage.

2.10 Other Service Establishment: A servicing establishment or service sector establishment is engaged in activities carried out for the benefit of a consuming unit. Such consuming units could be individuals or other institutional units. Activities of service establishments typically results in changes in the condition of consuming units when such activities are realized by the consuming unit on demand. It is possible for a unit to produce a service for its own consumption provided that the type of activity is such that it could have been carried out by another unit. Some examples of changes that a producer of service brings about in the condition of consumers of service are:

- a) *Changes in the condition of consumer's goods:* the producer works directly on goods owned by the consumer by transporting, cleaning, repairing or otherwise transforming them;
- b) *Changes in the physical condition of persons:* the producer transports the persons, provides them with accommodation, provides them with medical or surgical treatments, improves their appearance, etc.;
- c) *Changes in the mental condition of persons:* the producer provides education, information, advice, entertainment or similar services;
- d) *Changes in the general economic state of the institutional unit itself:* the producer provides insurance, financial intermediation, protection, guarantees, etc.

All activities listed under Sections H – U of NIC 2008 are considered as *other service activities*. Further, activities under Section E are also under coverage. However, Section F (Construction), O (Public administration and defence; compulsory social security), T (Activities of households as employer; undifferentiated goods and services producing activities of households for own use) and U (Activities of extraterritorial organizations and bodies) are excluded from coverage of this survey. Only unincorporated establishments in the service sector under coverage as described in Annexure I of Chapter 1 have been surveyed. Among these also, activities under certain NIC 2008 codes are out of survey coverage, viz., 491 (transport via railways), 49212 (urban or suburban tramways), 49213

(urban or suburban underground or elevated railways), 493 (transport via pipeline), 51 (air transport), 641 (monetary intermediation) excluding special code 64193, 642 (activities of holding companies), 65 (insurance, reinsurance and pension funding), 6611 (administration of financial markets), 942 (activities of trade unions), 9492 (activities of political organizations).

2.11 Financial Establishment: A financial establishment is a servicing establishment that is principally engaged in financial intermediation or in auxiliary financial activities, which are closely related to financial intermediation. Financial intermediation is a productive activity in which an institutional unit incurs liabilities on its own account for acquiring financial assets by engaging in financial transactions in the market. The role of financial intermediaries is to channelize funds from lenders to borrowers by intermediating between them.

2.12 Household Establishment: A household establishment is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the establishment is located in the premises of the household(s) or not. In other words, all proprietary and partnership establishments are household establishments.

2.13 Non-household Establishment: Non-household establishments are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc.

2.14 Worker: Worker is defined as persons working within the premises of the establishment who are in the payroll of the establishment as well as the working owners and unpaid family members who help in the entrepreneurial activity. The helpers, apprentices, interns engaged by the establishment are also treated as worker. The worker may serve the establishment in any capacity - primary or supervisory. He/she may or may not receive wage/salary in return to his/her work incidental to or connected with the entrepreneurial activity. Sales persons appointed by an establishment for selling its products/services, *paid or unpaid*, are also treated as workers. A worker need not mean that the same person would be working continuously; it would only refer to a position. i.e., if one person is terminated and another person is appointed in his place, it has been counted as 1 and not 2. A worker engaged for more than half of the normal working hours of the establishment has been treated as **full time worker**.

2.14.1 In case of SHGs, if any member (including office bearers) performs the activities of the SHG by drawing remuneration, they are treated as working owner. Members of SHG who attend meetings regularly or participate in the activities of the SHG including decision making process without taking any remuneration are not treated as workers for the purpose of this survey. Instead, they are considered as 'active members of SHG'. There may also be hired worker or other workers assisting the activities of SHG.

2.14.2 Formal hired worker: A formal hired worker is one who is eligible for paid leave and also eligible for social security benefits like provident fund, ESIC, health insurance, etc. provided by the employer.

2.14.3 Informal hired worker: An informal hired worker is not eligible for paid leave and/or not eligible for social security benefits like provident fund, ESIC, health insurance etc. provided by the employer. Several small establishments are expected to have informal hired workers.

2.15 Emoluments: Regular payments made by establishments to the individual workers (including working owners, if any) such as salary / wages, bonus etc. either in cash or in kind or both. There may be other type of payments like canteen facility, health care facility, recreation club facility, etc. which are paid in kind to a group or to all the workers of the establishment. All such payments, whether individual payments or payments made to a group, are considered as emoluments.

2.16 Own Account Establishment (OAE): An establishment which is run without any hired worker employed on a fairly regular basis⁵ is termed as an own account establishment.

2.17 Hired Worker Establishment (HWE): An establishment which is employing at least one hired worker on a fairly regular basis is termed as hired worker establishment. Paid or unpaid apprentices, paid household member/servant/resident worker in an establishment are considered as hired workers.

2.18 Perennial establishment: Establishments that are run more or less regularly throughout the year are called perennial establishments.

2.19 Seasonal establishment: Seasonal establishments are those which are usually run in a particular season or fixed months of a year.

2.20 Casual establishment: Establishments that are run occasionally, for a total of at least 30 days in the last 365 days, are called ‘casual establishments’.

2.21 Multiple Activities: Since many of the entrepreneurs belonging to the unincorporated sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. Carrying out of more than one economic activity by the entrepreneur during the reference year is called multiple activities. If the activities are carried out at the same location and the **information is not separately available**, then it has been taken as “mixed activity” for ASUSE. If the activities are carried out at the same location and the **information is separately available**, then it has been taken as “multiple activity”. However, an entrepreneur of a manufacturing establishment manufacturing woollen garments before winter and cotton clothes before summer would not be considered as carrying out multiple activities. Some examples of multiple activities are: i) a person providing computer services during day-time as an own account establishment and also providing tuition in the evening in his own coaching centre, ii) a person carrying out agricultural activity during sowing / harvesting season and doing carpentry at the same time or at other times, etc.

2.22 Mixed Activity: There are establishments that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, etc. Each such activity is treated as a separate establishment if information for them is separately available. If the accounts are not separable then the data pertaining to the establishment as a whole has been collected and the establishment is classified as having mixed activities and the activities of such establishments are a mixture of NIC’s. The activities may be mixed at any level of NIC, but for the present survey, an establishment has been considered to have done mixed activities if its activities were different at 2-

⁵ ‘fairly regular basis’ means the major part of the period when operation(s) of an establishment are carried out during a reference period.

digit level of NIC-2008. The appropriate NIC in such cases has been determined on the basis of major activity. Major activity refers to the activity which yielded maximum income followed by turnover and then by employment.

2.23 Classification of establishments based on ownership:

2.23.1 **Proprietary:** When an individual is the sole owner of an establishment, it is called a proprietary establishment.

2.23.2 **Partnership:** Partnership is defined as the ‘relation between persons who have agreed to share the profits of a business carried out by all or any one of them acting for all’. There may be two or more owners, belonging to the same or different households, on a partnership basis, **with or without formal registration** (where there is a tacit understanding about the distribution of profits among the so-called partners).

2.23.3 **Limited Liability Partnership:** A limited liability partnership is a body corporate⁶ formed and incorporated under this *Limited Liability Partnership Act* (2008) and is a legal entity separate from that of its partners. A limited liability partnership shall have perpetual succession. Any change in the partners of a limited liability partnership shall not affect the existence, rights or liabilities of the limited liability partnership. However, they are outside the coverage of ASUSE. Besides, other incorporated entities such as PSUs, Companies (Government and Non-Government), etc. are also outside the coverage of ASUSE.

2.23.4 **Public Sector Unit/Enterprise:** An enterprise, which is wholly owned/ run/managed by Central or State governments, quasi-government institutions, local bodies like *Panchayat, Zilla Parisad, City Corporation, Municipal authorities, etc.*, autonomous bodies like Universities, Education boards, and institutions like schools, libraries etc. set up by the government, panchayat, etc., are treated as public sector enterprise. Enterprises owned/ managed by a single or a group of private persons with no participation of the Government, local body etc. in it, both in terms of management and shares, are treated as private sector enterprises. An enterprise should not be treated as a public sector enterprise if it is run on a loan granted by government, local body, etc.

2.23.5 **Cooperatives:** A cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly-owned and democratically-controlled establishment. Examples could be:

- businesses owned and managed by the people who use their services (a consumer cooperative)
- organizations managed by the people who work there (worker cooperatives)
- second- and third-tier cooperatives whose members are other cooperative

For the purpose of this survey, only cooperatives registered under the ‘Cooperative Societies Act’ have been considered as eligible cooperatives.

⁶ Body corporate broadly means a corporate entity which has a legal existence. This includes a private company, public company, Limited Liability Partnerships, foreign company, etc.

2.23.6 **Society:** Any group of persons associated for any literary, scientific or charitable purpose, registered under the Societies Registration Act 1860 or any State specific 'Societies Act' has been considered as Society for this survey.

2.23.7 **Trust:** An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, must be administered in the interests of the beneficiaries, and not for the profit of the trustees. For the purpose of this survey, only trusts registered under the Indian Trust Act 1882 or any State specific Act have been considered as eligible trusts.

2.23.8 **Club/Association/Body of individuals:** A club/association/body of individuals is a group of two or more people united by a common interest or goal. They may or may not be registered with any authority.

2.23.9 **Non-Profit Institutions (NPI):** Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but the units that establish, control or finance them cannot appropriate surpluses. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share any profits or other income which the NPI's receive. For this reason, they are frequently exempted from various kinds of taxes. NPIs are principally non-market producers but they may engage in market production also. Non-market production means production of goods and/or services at economically insignificant price. Non-profit institutions serving households (NPISHs) are legal entities that are principally engaged in the production of non-market services for households or the community at large and whose main resources are voluntary contributions/sponsorship.

2.23.10 **Self-help Groups:** A **self-help group (SHG)** is a financial intermediary usually composed of a number of local persons. Members make small regular savings contributions over a few months until there is enough capital in the group to begin lending. Funds are lent back to the members or at times to others. In India, many SHGs are 'linked' to banks for the delivery of microcredit.

2.23.10.1 **Activity of self-help groups:** Self-help groups are essentially engaged in the **financial intermediation** i.e. the activity of the SHG is focussed to provide loans to the members and the members can utilise the loan for the purposes - personal or entrepreneurial. However, an SHG may be formed initially and later all or some members may be engaged in group-based non-financial activities.

2.23.10.2 **Determination of eligibility of an SHG:** An SHG is considered as eligible establishment for the purpose of this survey if the total number of days of operation of that SHG is at least 15 days in the last 365 days. Working days include-

- a) Days of meeting;
- b) Days of interaction with the bank for purpose of deposit/withdrawal/loan/repayment etc.; and
- c) Days of performing other jobs related to SHG like maintenance of register.

2.23.10.3 In case of SHGs, if any member (including office bearers) performs the activities of the SHG by drawing remuneration, they are treated as working owner/workers. Members of SHG who attend meetings regularly or participate in the activities of the SHG including decision-making process without taking any remuneration have not been treated as a worker for the purpose of this survey. Instead, they are considered as 'active members of SHG'.

2.24 **Investment Club:** Investment clubs are a group of people who pool their money to make investments. Usually, investment clubs are organized as partnerships where members usually meet on periodic basis and study different investments, to make investment decisions as a group. The decisions on buying and selling (investment) are made through voting process. Club meetings may be educational and each member may actively participate in investment decisions. The income and losses of the club are passed through to its partners and are reported on their individual tax returns.

Chapter Three

Summary of Findings

3.1 Introduction

3.1.1 This chapter contains the key indicators of ASUSE 2022-23. The estimates of different operational and economic characteristics of ASUSE 2022-23 are presented here. It is pertinent to mention that some of the ratio estimates like gross value added per establishment, gross value added per worker, annual emoluments per hired worker, fixed assets per establishments etc., in addition to the aggregate estimates, such as number of establishments, number of workers etc. are included among the economic characteristics. The value figures reported for the different economic parameters are at current prices only.

3.1.2 The detailed tables on the operational and economic parameters are generated at many layers of disaggregation, such as State/UT, 'sector', 'broad activity category' (BAC), 'activity category', and 'establishments type' and attached at **Appendix A**. It is important to note that, 'sector' consists of rural and urban; whereas, 'establishment type' contains own account establishments (OAE) and Hired Worker Establishments (HWE). As per coverage of ASUSE, the different 'broad activity categories' are manufacturing, non-captive electricity generation, trade and other services. Further, there are twenty five (25) activity categories under manufacturing, five (5) activity categories under trade and fifteen (15) activity categories under different types of services other than trade under the heading 'other services'. The detailed composition of these activity categories has been placed in Annexure-I at the end of Chapter 1.

3.1.3 It is observed that the sample size for non-captive electricity generation is very small. In fact, only three (3) samples have been found belonging to this broad activity category. Accordingly, no separate estimates are presented for this BAC. However, the contribution of non-captive electricity generation sector is included in 'total' or 'all activities'. Further, estimates of Relative Standard Errors (RSEs) are also generated for important parameters and are included in detailed tables in Appendix A. Users are advised to observe these RSEs very carefully, particularly, at the disaggregated level and interpret/use the results accordingly with due caution.

3.1.4 The State/UT-wise detailed tables presented in 'Appendix A', *inter alia*, provide the combined estimates of the UTs of Dadra and Nagar Haveli and Daman and Diu in view of merger of these two UTs. Further, the State/UT-wise summary statements, for the purpose of this Report, are considered for the 'major States' only. The 'major states' are those states whose population was more than 1 crore as per Census 2011. Further, a few states have been split after 2011 and for them both Census 2011 population and total number of FSUs are considered while deciding 'major states'. In this context, it is to mention that erstwhile Andhra Pradesh has been split into two States, viz., Andhra Pradesh and Telangana in 2014. Accordingly, both Andhra Pradesh and Telangana have been included in the list of 'major states', as mentioned above. Moreover, erstwhile Jammu & Kashmir also had population of more than 1 crore as per Census 2011. Hence, Jammu & Kashmir has been included in the list of 'major states' for the purpose of this chapter. However, Ladakh is excluded as it had very less number of FSUs. The list of such 'major states' is given below. It may be mentioned that, NCT of Delhi is essentially an urban state and hence, the

rural part of Delhi is very small. Accordingly, the estimates pertaining to Delhi rural may suffer from reliability and hence, may be used with caution (Refer statement 1).

Major States:

- | | | | |

| • Gujarat | • Madhya Pradesh | • Telangana | |

3.1.5 The reference period of the estimates generated for ASUSE 2022-23 refers to the period from October, 2022 to September, 2023. The data has been collected for three reference period, namely, ‘last 30 days’, ‘last calendar month’ and ‘last accounting year’. However, there was option for the establishments to provide the data for ‘last 30 days’ or ‘last calendar month’ if audited books of accounts is not maintained or is not finalized at the time of survey. However, there have been a few establishments, though very small in number (less than 1%), that have supplied data from audited books of accounts pertaining to the last financial year 2021-22. Thus, majority of the establishments has provided ‘30 days’ data and hence, the estimates are essentially linked to the period October, 2022 to September, 2023.

3.1.6 In this chapter, some important facts and estimates of broad operational and economic indicators from this survey have been briefly presented. In paragraph 3.2 the Sample number of Establishments and in paragraph 3.3 the estimated number of Establishments are provided. The ownership-wise estimates are discussed in paragraph 3.4. This is essentially the information of the establishments categorised based on various types of ownership such as ‘proprietary’, ‘partnership’, SHGs, etc. The information of social group of the owner, in case of ‘proprietary’ establishment, or that of the major partner in case of the ‘partnership’ establishment are presented in paragraph 3.5. The type of location of the establishment i.e., whether the establishment is located in the household premise or is located outside the household premise are discussed in paragraph 3.6. The various operational details of the establishments such as, number of months operated, number of working hours in a normal day, whether maintaining accounts, registration status etc., are discussed in paragraph 3.7. The information on establishments providing manufacturing services or other services on contract basis are provided in paragraph 3.8. The paragraph 3.9 is devoted to those establishments which are engaged in ‘mixed activities’. Many times an establishment carries out more than one activity- one principal or major activity, and other(s) minor activity. Information of establishments involved in such activities is discussed in paragraph 3.9. The Non-profit Institutions (NPIs) in the unincorporated sector are discussed in paragraph 3.10. Use of computer and internet for entrepreneurial activity is highlighted in paragraph 3.11. Thereafter, the estimates of different economic aggregate parameters such as workers, female workers, Gross Value Added (GVA) are discussed in paragraphs 3.12, 3.13 and 3.14, respectively. Key ratio estimates such as annual GVA per establishment and annual GVA per worker, both pertaining to market establishments, are discussed respectively in paragraphs 3.15 and 3.16. Further, annual emoluments per hired worker is shown in paragraph 3.17. Finally, the discussion on economic parameters is completed after describing fixed assets per establishment in paragraph 3.18 and outstanding loan per establishment in paragraph 3.19. Paragraph 3.20 containing the estimates of Relative Standard Error (RSE) for important key parameters is included for gauging the reliability of the estimates. Finally, paragraph 3.21 is appended to provide a brief comparison of ASUSE 2022-23 (October,2022 – September,2023) over ASUSE 2021-22 (April,2021 – March,2022).

3.2 Sample number of Establishments

3.2.1 A total number of 16,497 (8,568 in rural and 7,929 in urban) first stage units (FSUs) have been selected at all-India level for ASUSE 2022-23. Out of these, 16,382 FSUs (8,495 in rural and 7,887 in urban) have been surveyed; and the total number of establishments surveyed has been 4,58,938 (2,58,296 in rural areas and 2,00,642 in urban areas). Statement 1 gives the State/UT-wise count of FSUs allotted and surveyed number of establishments.

3.3 Estimated number of Establishments

3.3.1 ASUSE 2022-23 gives an estimate of 6.50 crore establishments belonging to unincorporated non-agricultural sector for the period October, 2022 – September, 2023 (refer Statement 2) for different broad activity categories (BAC). Out of these 6.50 crore establishments, 3.56 crore belong to the rural sector and 2.94 crore to the urban sector. This indicates that more number of unincorporated non-agricultural establishments existed in the rural economy during October, 2022 – September, 2023.

3.3.3 The share of manufacturing, trade and other services to the total estimated number of establishments stands at 27.41%, 34.71% and 37.88% respectively (see Statement 3). It is other services whose share is maximum to the estimated number of establishments in both rural (37.49%) and urban (38.37%) areas.

3.3.4 In ASUSE, the selected establishment may either be Own Account Establishment (OAE) or Hired Worker Establishment (HWE). It is found that, 5.53 crore establishments out of estimated 6.50 crore are OAEs. The OAEs, as mentioned before, are those establishments which have not employed at least one hired worker on a fairly regular basis. In fact, only 97 lakh establishments have been estimated as HWE. Further, most of the selected OAEs and HWEs are observed to be engaged primarily in other services.

3.3.5 Statements 4R, 4U and 4ALL give the top three (3) activity categories under respective BACs for 'rural', 'urban' and 'combined rural and urban', separately. It is clearly seen that, 'Other retail trade' (T5) is the top contributor, with a contribution of around 30%, to the total number of establishments for rural, urban and also combined rural and urban in ASUSE 2022-23. Further, 'Manufacture of wearing apparel'

(M6) is second highest contributor to the total number of establishments for rural and the combined sector; whereas, ‘Other community, social and personal service activities’ (S15) stand at second position for urban sector. In rural areas, about 69% of the manufacturing establishments are engaged in the activities of manufacturing of wearing apparel (M6), manufacture of tobacco products (M4) and manufacture of food products (M2); whereas in the urban, the major three manufacturing activities are manufacture of wearing apparel (M6), manufacture of textiles (M5) and manufacture of food products (M2) with their combined share of about 65%. Among the establishment engaged in trading activities, the proportion of establishment engaged in the activity of ‘other retail trade’ (T5) is highest in both rural (91%) and urban areas (84%).

3.3.7 The statements 6R, 6U and 6ALL give the position of top 3 State/UTs having most number of unincorporated non-agricultural establishments across different combinations of sector, BAC and establishment type. Uttar Pradesh (15.83%), West Bengal (12.67%) and Bihar (7.88%) are the top 3 states in rural sector in terms of estimated number of establishments; whereas in urban sector it is Maharashtra (12.04%), Uttar Pradesh (11.39%) and West Bengal (11.27%) that tops the list. Again, for 'rural and urban combined', Uttar Pradesh (13.82%), West Bengal (12.03%) and Maharashtra (9.37%) have reported most number of unincorporated non-agricultural establishments during ASUSE 2022-23.

3.3.8 Maximum number of HWEs, during ASUSE 2022-23, has been observed in Maharashtra (13.29%). At the same time, Uttar Pradesh captures 14.46% of the total OAEs, thereby producing most number of unincorporated non-agricultural OAEs in the country during the period October, 2022 to September, 2023. Uttar Pradesh, further continues to top the list of having maximum number of establishments belonging to 'trade' (16.93%) and 'other services sector' (12.33%). However, it is West Bengal (16.18%) that has the maximum number of manufacturing establishments during ASUSE 2022-23.

3.4 Type of Ownership

3.4.1 ASUSE is an establishment survey. Different types of ownerships captured in this survey are proprietary (male/female/transgender), partnership with members of the same household, partnership between members not all from the same household, Self-help groups, society/trust/club/association/ body of individuals/ membership organizations, co-operatives and others. Statement 7 gives the per 1000 distribution of establishments by type of ownership for different establishment types at all-India level.

3.4.2 It is evident that majority of the establishments in the unincorporated non-agricultural sector has been proprietary concerns during ASUSE 2022-23 in both rural and urban economy. Overall, about 95% of the total establishments are proprietary. The participation of SHGs, through financial intermediation, are to the tune of 3.7 % of total establishments.

3.4.4 The per 1000 distribution of establishments by type of ownership for major states is shown in Statement 8. This statement also shows that most of the establishments are proprietary across the State/UTs. In fact, barring only a few, the percentage share of proprietary establishments is more than 90% for all the major State/UTs. Among the partnership establishments, the predominant prevalence is observed in Kerala followed by Gujarat and Haryana among the major states. Further, it can be observed that Andhra Pradesh, Chhattisgarh, Jharkhand and Odisha are the States where about 10% of the total unincorporated non-agricultural establishments are Self Help Groups (SHG).

3.4.5 A significant portion of unincorporated non-agricultural establishments is home-based and some of which may be headed by a female entrepreneur. It is important to observe the participation of female entrepreneur as owner of the establishment in the unincorporated economy. Statement 9, providing share of female headed establishments among the proprietary concerns across different BACs for the major states, have been generated for this purpose.

3.4.6 It is noticed that there are as many as seven (7) major States such as, Telangana (43.32%), West Bengal (32.74%), Karnataka (31.42%), Andhra Pradesh (27.84%), Tamil Nadu (27.66%), Gujarat (27.14%) and Kerala (26.75%) where about one-fourth of the proprietary establishments has been run by female entrepreneur during ASUSE 2022-23. Moreover, in case of manufacturing, the percentage share of female headed proprietary establishments is more than 50% not only at all-India level but also for 11 different States out of 21 major States.

3.5 Social Group of Owners

3.5.1 Social group of owners of the establishments i.e. of proprietors (in case of proprietary concerns) and major partner (in case partnership concerns) have been collected in ASUSE 2022-23. 'Major partner' in case of partnership establishments is the major working owner. The criterion for determining 'major' has been the partner getting maximum share of the profit of the establishment, or bearing the maximum part of the loss. If all the partners share the profit/ loss of the establishment equally, the partner taking major decisions of the establishment is the major partner. If the decisions are taken collectively, the senior most partner by age is considered as major partner. Statement 10 gives the per 1000 distribution of proprietary and partnership establishments by social group of owner/ major partner for each sector and establishment type.

The same trend is also noticeable across sector and establishment type.

3.5.3 Statement 11 is shown to provide the per 1000 distribution of proprietary and partnership establishments by social group of owner/ major partner for each BAC and establishment type.

3.6 Type of Location

3.6.1 Establishments belonging to unincorporated sector, tend to have different types of location for operating their businesses. Some establishments operate in the concerned household premise; whereas others tend to operate with a fixed premise which is outside the household. It is also very common for certain establishments (such as street vendors, rickshaw pullers, auto/taxi drivers etc.) to carry out their activity even without any fixed premises. Per 1000 distribution of establishments over these varied types of locations for different sectors and establishment type at all-India level is given in Statement 12. Per 1000 distribution of establishments by type of location at all-India level for different sectors is pictorially depicted in Figure 2.

3.6.2 Statement 12 reveals that overall about 41% of the total unincorporated establishments have operated within household premises during October, 2022- September, 2023; whereas about 44% establishments have been located outside household premises but they had operated on a fixed premise through permanent/temporary/without any structure.

3.6.3 About 84% of HWEs are located on a permanent structure outside household premise; whereas location of majority (about 46%) of the OAEs are home based. The percentage of HWEs, carrying out their operations on a permanent structure outside household premise, are 74.4% and 87.6% respectively in the rural and urban economy.

3.6.4 The per 1000 distribution of establishments by type of location and sector for major States is given in Statement 13. It may be noted that during ASUSE 2022-23, more than one-fifth of the unincorporated establishments have operated without any fixed premise in the rural area of a number of States, such as, Andhra Pradesh, Jharkhand, Karnataka, Odisha and West Bengal; whereas home-based rural establishments (i.e., located within household premises) is highest in Telangana (71%) followed by Madhya Pradesh (62%) and Chhattisgarh (60%); whereas in urban sector there is a tendency of the unincorporated non-agricultural establishments to operate on a fixed premise across the State/UTs. In urban sector, the proportion of establishments operated in fixed premise but outside household is 55% at all-India level. However, this proportion varies from 37% to 83% in different major states of urban areas.

3.7.1 Various operational details of the unincorporated non-agricultural establishments such as, number of months operated during last 365 days, number of working hours in a normal day during the reference month, whether maintaining accounts, registration status etc., are captured in ASUSE survey. Per 1000 distribution of establishments by number of months operated during the last 365 days and by working

3.7.2 From Statement 14, it is evident that 94% of the overall establishments have operated at least 9 months during the last 365 days. The corresponding percentages of establishments operating for at least 9 months during the last 365 days in rural and urban sector have been 93.9% and 94.8% respectively. These are basically the perennial establishments which normally operate throughout the year. In addition to that, there are other seasonal and casual establishments also, which operate during a fixed season or rather casually. Overall, there were only 1% establishments which have operated for less than three months during the last 365 days.

It is interesting to note that there are about 11% establishments in rural and 7% in urban sector, which have run for less than 4 hours daily to manage their businesses.

3.7.4 Further, Statement 16 is generated to show the per 1000 distribution of establishments maintaining accounts by sector and type of establishments. In this context, it is pertinent to mention that an establishment is treated as maintaining accounts only if it has audited or auditable books of accounts. As normally can be expected, majority (93.6% to be exact) of the unincorporated establishments do not maintain any audited books of accounts. The tendency of not maintaining audited accounts is much more glaring in respect of OAEs rather than HWEs. In fact, 17.2% of the rural HWEs, 23.5% of urban HWEs and 21.6% of overall HWEs maintain audited accounts.

3.7.5 Registration under different acts/authorities, which are numerous in count, for unincorporated establishments is not only an important aspect of maintaining administrative records for the Government but also essential for the establishments for availing of benefits under different Government schemes. ASUSE captures information regarding status of registration in respect of the surveyed establishments under various acts (such as, Shops & establishment Act, Indian trust Act 1882 (incl. State Public Trust Act), Societies Registration Act, 1860, Co-operative Societies Act, 1912, GST Act, etc.) and authorities (such as, Food safety and Standard Authority, Employee PF Organization, Employee State Insurance Corporation, State Directorate of Industries, Regional Transport Office, etc.). Percentage of establishments over registration under different acts/authorities for each BAC at all-India level is given in Statement 17.

Statement 17: Percentage of establishments by status of registration for each broad activity category

3.7.6 It is worthwhile to mention that an establishment could be registered under more than one acts/authorities simultaneously. Hence, the sum total of all the categories of registration in Table 25 and 26 of Appendix A may not necessarily be 1000 always.

3.7.7 It is revealing that about 63.2% of the estimated establishments during ASUSE 2022-23 in the unincorporated sector are not registered under any acts/authorities at all. On the other hand, status of registration under different acts/authorities is observed in respect of about half or more than half of the establishments in the other services sector (for both rural and urban) and trade sector (for urban). The phenomenon of non-registration is quite high in the rural sector (particularly, in manufacturing and trade) and in the urban sector (particularly, in manufacturing).

3.8 Establishments providing Manufacturing services/Other services on Contract

3.8.1 Providing manufacturing services or other services on contract is a common phenomenon among the unincorporated non-agricultural establishments. In such cases, the service provided by the establishment on contract is consumed by other establishments or other households. Statement 18 gives the percentage of establishments which undertook contract work of providing manufacturing services/other services during ASUSE 2022-23 by establishment type and sector.

Statement 18: Percentage of establishments undertaking contract work of providing manufacturing services/other services by establishment type and sector

OAE	7.96	6.74		7.46
All	7.61	6.11		6.93

**includes non-captive electricity generation and transmission Reference: table 27 of Appendix A*

3.8.2 It is noticeable that about 7% of the overall establishments have provided manufacturing services/other services on contract during ASUSE 2022-23. Percentage of OAEs is more than that of HWEs while rendering manufacturing services/other services on contract.

3.9 Establishments engaged in Mixed Activities

3.9.1 Because of inherent uncertainty in the unincorporated sector, establishments in this sector tend to engage in multiple activities to survive. The cases, where establishments cannot bifurcate accounts pertaining to multiple activities carried out by them, are treated as establishments engaged in mixed activities. In this context, it is pertinent to mention that activities, that are different at National Industrial Classification (NIC)-2008 2-digit level, are treated as separate activities for the purpose of the survey.

3.9.2 Statement 19 shows the percentage distribution of establishments pursuing mixed activities in each broad activity category and sector. It may be seen that, only 3.62% of the total establishments has been engaged in mixed activities during ASUSE 2022-23.

3.9.3 Further, the percentages of establishments pursuing mixed activities in manufacturing, trade and other services are observed to be 4.32%, 3.03% and 3.64% respectively.

3.10 Non-profit Institutions (NPIs) in the unincorporated sector

3.10.1 Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but the units that establish, control or finance them cannot appropriate the surpluses. NPIs are principally non-market producers i.e. they sell their output at economically non-significant price; but there may be NPIs who may engage in market production also.

3.10.2 Statement 20 is presented to show the number of NPIs by type of major receipts and non-NPIs per 1000 of establishments in each broad activity category and sector. As is clearly evident, 99.5% of the estimated unincorporated non-agricultural establishments are observed to be non-NPIs during ASUSE 2022-23. The same fact is also noticeable across the broad activity categories and sectors.

3.10.3 It is worthwhile to mention that, NPIs have been observed (although very few in number) in the other services sector, whose major receipt is not from grants/donations; but from other sources by virtue of carrying out market production of services that they are rendering.

3.11 Use of Computer and Internet in the unincorporated sector

3.11.1 Use of modern technology through computer and/or internet is considered to be a major focus area for this sector. It is required for various activities ranging from managing the business more efficiently to sales expansion and improved visibility in digital platforms. It is seen that about 21% of the total establishments has used internet for the purpose of entrepreneurial activities during ASUSE 2022-23.

Statement 21A and 21B have been given to show the degree of usage of computer and internet among these establishments for the purpose of entrepreneurial activities.

3.11.2 It is evident from Statement 21A that 23.6% of HWEs have used computer considering both rural and urban, whereas the corresponding figure for OAE is 3% who have used computer for business purposes during ASUSE 2022-23. The percentage of HWEs using computer for business purposes is 11.4 in manufacturing, 23.1 in trade and 31.3 in other services. The OAEs, though very small in size, have used computer for business purposes too. The percentage of OAEs using computer for business purposes is 0.4 in manufacturing, 1.9 in trade and 6 in other services. Further, the percentage of establishments using computer for business purposes is more in urban than its rural counterpart regardless of broad activity category and establishment type.

3.11.3 It is evident from Statement 21B that 48% of HWEs have used internet considering both rural and urban, whereas the corresponding figure for OAE is 16.4% who have used internet for entrepreneurial purposes during ASUSE 2022-23. The percentage of HWEs using internet for entrepreneurial purposes is 35.8 in manufacturing, 50.6 in trade and 52.1 in other services. The percentage of OAEs using internet for entrepreneurial purposes is 8.2 in manufacturing, 19.6 in both trade and other services. Further, like usage of computer, the percentage of establishments using internet for entrepreneurial purposes is more in urban than its counterpart in rural areas.

3.12 Estimated Number of Workers

3.12.1 One of the major importance of unincorporated non-agricultural sector lies in its potential to generate employment and absorb labour force. For this purpose, Statement 22 is presented to show the estimated number of workers in unincorporated sector during ASUSE 2022-23 categorised by BAC, sector and establishment type.

3.12.2 Statement 22 reveals that, unincorporated non-agricultural sector has employed a little more than 10.96 crore workers during ASUSE 2022-23, i.e. October, 2022 – September, 2023. These workers include working owners, hired workers, unpaid family members involved in the establishments and others, etc. Out of the total workers, 5.72 crore are from urban areas; whereas rural areas have seen creation of employment to the tune of 5.24 crore during ASUSE 2022-23 in the unincorporated non-agricultural sector.

3.12.3 Statement 23 gives the corresponding percentage shares. The percentage share of estimated number of workers at all-India level by broad activity categories is pictorially depicted in Figure 3. At all-India level, other services contributes the maximum share (36.45%) to total employment followed by trade (35.61%) and manufacturing (27.94%). In respect of OAEs, maximum share comes from trade

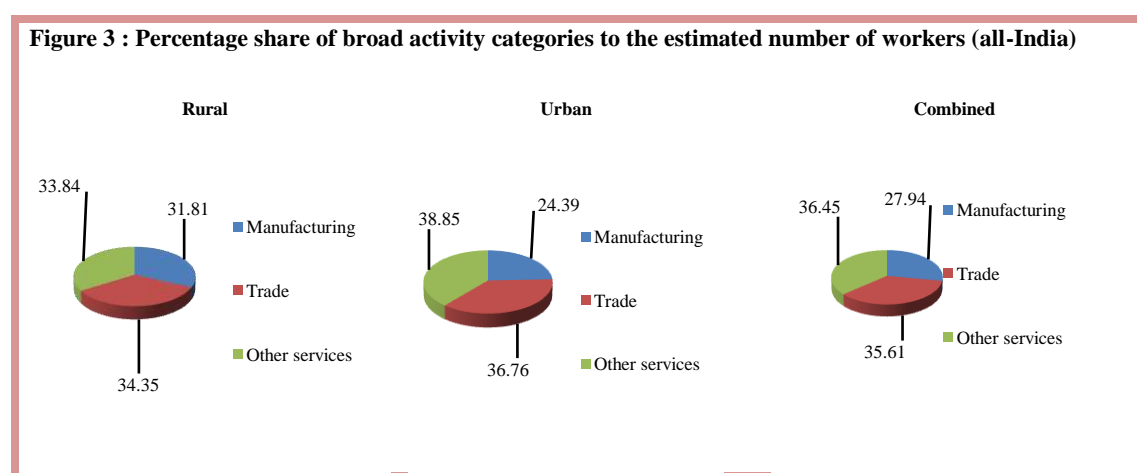

(39.62%). However, it is other services (43.42%) which have contributed the most to the overall employment among HWEs.

3.12.4 Statements 24R, 24U and 24All may be seen to ascertain the top three activity categories having highest share of workers under each broad activity categories. From these statements it appears that, 'other retail trade' (T5) singly generated about one-third share of total employment in the unincorporated non-agricultural sector during ASUSE 2022-23 at rural, urban and also at all-India level. It is followed by 'manufacture of wearing apparel' (M6) (8.39%) and 'other community, social and personal service activities'(S15) (8.19%) overall. Further, the proportion of workers, at all-India level, found to be maximum in 'other retail trade' (T5) among the HWEs (19.16%) as well as OAEs (36.32%).

3.12.5 From Statement 24All, it is observed that percentage share of workers in unincorporated manufacturing sector is maximum in the activity of 'manufacture of wearing apparel' (30.02%). It is also found that the share of the activity of 'manufacture of wearing apparel' (M6) to total estimated worker is highest (among those who pursue manufacturing activity) in OAEs. Among the establishments which are engaged in trading activity, the percentage share of workers is highest in 'other retail trade' (T5) for both HWEs (65.91%) as well as OAEs (91.68%). In regard to other service activities, the contribution of 'food and accommodation service activities'(S2) and 'land transport'(S3) are noteworthy in generation of employment.

3.12.6 Statement 25 provides the percentage share of the major states to the total employment. It is supplemented by Statements 26R, 26U and 26All which identifies the top 3 State/UTs under each BACs for providing employment. It is revealed that Uttar Pradesh (14.36%), Maharashtra (10.54%) and West Bengal (9.62%) have been the top three States in terms of providing employment in the unincorporated non-agricultural sector at all-India level. Uttar Pradesh again continues to be the top in terms of having most workers in respect of trade (16.72%) and other services (13.24%) so far as unincorporated sector is concerned. However, West Bengal generated most employment in unincorporated manufacturing sector (13.66%).

3.12.7 The top States producing employments in respect of HWEs are Maharashtra (12.87%), Uttar Pradesh (11.20%) and Tamil Nadu (10.56%). However, in case of OAEs it is found that Uttar Pradesh (16.29%), West Bengal (11.60%) and Maharashtra (9.10%) are in the top for providing employment (see Statement 26R, Statement 26U, Statement 26ALL for rural, urban, and both rural and urban combined).

3.13 Participation of Female Workers

3.13.1 Statement 27 is generated to present the participation of women in the total workforce of the unincorporated non-agricultural sector.

3.13.2 Overall, 25.63% of the total workers, during ASUSE 2022-23, happen to be female. This includes significant presence of female workers to the tune of 31% of the total workforce of the OAEs. In case of HWEs the percentage share of female workers to total workers stands at 17.39%. So far as the BACs are concerned, it is manufacturing where participation of female workers is the highest. As a matter of fact, among the total workers engaged in unincorporated manufacturing activities during ASUSE 2022-23, 49.78% in rural, 34.92% in urban and 43% in overall are female workers.

3.14 Estimated Gross Value Added (GVA) (Market establishments)

3.14.1 Gross Value Added (GVA) is one of the key measures to evaluate the performance of any sector of an economy. The GVA has been estimated for unincorporated non-agricultural sector from ASUSE 2022-23. Although the data was collected for different reference periods, viz. 'last 30 days', 'last accounting year', etc., by GVA we mean annual GVA which is in current prices. Statement 31 is generated below to display the percentage share of broad activity categories in total GVA by sector and establishment type. In this context, it is pertinent to mention that GVA has been compiled for market establishments⁷ belonging to unincorporated non-agricultural sector, which comprises of more than 99% of total establishments. 'GVA at basic price' has been calculated for all the establishments. GVA is defined as total output *minus* total input. Here, while computing 'Output' all the relevant receipts (including trade margin) *less* taxes on products and distributive expenses have been considered; whereas while computing 'input' all the relevant expenses incurred are considered.

3.14.2 The pie chart given in Figure 4 pictorially represents the contribution of the BACs in the overall GVA of unincorporated non-agricultural economy. Statement 31 reveals that 'other services' has provided maximum value addition in the overall GVA at rural (41.11%), urban (40.49%) and all-India (40.71%) level for the unincorporated non-agricultural sector in ASUSE 2022-23; More than one-fifth of the total GVA has come from manufacturing in respect of all the sectors; the respective percentage share for rural, urban and combined being 26%, 21.97% and 23.39% respectively.

⁷Market establishments are those which sell their manufactured product and/or services rendered at an economically significant prices. In ASUSE 2022-23, more than 99% of the surveyed establishments are market establishments.

3.14.3 The top 3 activity categories generating maximum share of GVA under respective BACs across sector and establishment type are given in Statements 32R, 32U and 32All. At all-India level, ‘other retail trade’ (T5) (27.24%), ‘food and accommodation service activities’ (S2) (7.26%) and ‘land transport’ (S3) (6.89%) have registered maximum value addition, consuming about 41% of overall GVA during the period October, 2022 – September, 2023. On the other hand, ‘manufacture of wearing apparel’ (M6) (20.15%), ‘other retail trade’ (T5) (75.88%) and ‘food and accommodation service activities’ (S2) (17.82%) have generated most value addition for the concerned BACs viz. manufacturing, trade and other services respectively. In addition to that the role of ‘education’ (S13) (7.64%) in rural area and ‘other community, social and personal service activities’ (S15) (6.93%) in urban area are worth mentioning for their contribution to GVA in the respective sector.

3.14.4 The percentage share of major states in the GVA for rural and urban, and also for each establishment type is shown at Statement 33 below. Further, the top 3 major states (in terms of GVA) under each BAC for rural, urban and combined sectors, along with the corresponding shares, are given in Statement 34R, 34U and 34All respectively. From there it can be seen that Maharashtra (12.20%), Uttar Pradesh (10.56%) and Tamil Nadu (8.57%) together have contributed about one-third of overall GVA and by virtue of that, happens to be the top 3 GVA producing states in the unincorporated non-agricultural economy during ASUSE 2022-23. While Uttar Pradesh have possessed top position for providing maximum value addition in trade (11.99%) and Maharashtra in other services (13.62%), it is Gujarat (14.02%) which have emerged as the top producers of GVA in unincorporated manufacturing in the whole country.

3.14.5 The top 3 states producing maximum GVA, during ASUSE 2022-23, in urban area are Maharashtra (14.08%), Gujarat (10.29%) and Tamil Nadu (10.18%). However, Uttar Pradesh (14.05%), Bihar (8.75%) and Maharashtra (8.74%) have been the top states in terms of the most value addition in rural non-agricultural economy pertaining to unincorporated sector pertaining to the same period.

3.14.6 It may be mentioned that unincorporated financial sector is covered in ASUSE survey. Hence, it may be important to adjust the financial sector output by a reference rate for Financial Intermediation Services Indirectly Measured (FISIM), preferably at a macro level. Moreover, it is understood that there may be different approach for selecting reference rates and thus, there is an element of subjectivity in it. Accordingly, the financial sector output *vis-a-vis* GVA is not adjusted by any reference rate in this report. Users may apply their discretion and judgement while applying reference rate on the financial sector output. However, it is worth mentioning that monthly average savings deposit rate for scheduled commercial banks, as given by Reserve Bank of India (RBI), pertaining to the reference period of ASUSE 2022-23 may be a reasonable choice.

3.15 Annual Gross Value Added (GVA) per Establishment (Market establishments)

3.15.1 Annual Gross Value Added (GVA) per establishment has also been calculated for market establishments.

3.15.2 Annual GVA per establishment figures are available for activity category-wise (vis-à-vis broad activity category-wise) at different combinations of sector and establishment type in Table 37 and for State/UT-wise values at different combinations of Broad Activity Category (BAC), sector and at establishment type in Table 38 of Appendix A.

3.15.3 Statement 35, given below, provides the GVA per establishment (in Rs.) by broad activity category, establishment type and sector. Perusal of Statement 35 brings out that, GVA per establishment, on average, at all-India level during ASUSE 2022-23 has been Rs. 2,38,168. Expectedly, this figure is quite high for HWEs (Rs. 8,84,310) as compared to OAEs (Rs. 1,27,073). There is noticeable difference in producing value addition by a market establishment in urban sector (Rs. 3,41,298) in comparison to rural sector (Rs. 1,53,016).

3.16 Annual Gross Value Added (GVA) per Worker (Market establishments)

3.16.1 Annual Gross Value Added (GVA) per worker serves as a crucial metric for productivity, in general, and labour productivity, in particular. Annual GVA per worker in this report are calculated only for market establishments.

3.16.2 Statement 38 below provides the annual GVA per worker for different BACs, establishment type (i.e., HWE and OAE) and sector (i.e., rural and urban). It appears that annual GVA per worker, on an average, at all-India level has been Rs. 1,41,769 during ASUSE 2022-23. The same at rural and urban economy pertaining to unincorporated non-agricultural sector have been Rs. 1,04,483 and Rs. 1,75,842, respectively. Labour productivity is found to be maximum for HWEs at urban area (annually Rs. 2,22,746) during the ASUSE 2022-23. Working owners, who normally runs the OAEs themselves, in general, have produced annual value addition of Rs. 1,03,449.

3.16.4 Annual GVA per worker for each sector in respect of top 3 major states under each broad activity category by establishment types are given in Statements 40R,40U and 40All. These statements give an idea about the labour productivity prevailing in the major states across sectors. Figure 6 is given for the top 3 major states with maximum Annual GVA per worker for each sector with ‘all-India’ value as reference.

3.16.5 Delhi happens to be the most labour productive state among the major ones at all-India level. At the same time, Telangana at urban level have garnered the maximum GVA per worker. Except these

states, Gujarat and Punjab (for manufacturing), Kerala (for trading) and Chhattisgarh & Maharashtra (for other services) deserve special mentioning for producing significant GVA per worker during ASUSE 2022-23 at all-India level.

3.17 Annual Emoluments per Hired Worker

3.17.1 Unincorporated sector is an important domain for employment generation and its contribution to overall labour force is significant. A hired worker employed in the unincorporated sector may be formal or informal depending on the conditions of employment. A formal hired worker is one who is eligible for paid leave and also eligible for social security benefits like provident fund, ESIC, health insurance etc. provided by the employer. An informal hired worker is not eligible for paid leave and/or not eligible for social security benefits like provident fund, ESIC, health insurance etc. provided by the employer. On the other hand, compensation consists of salary/wages, bonus, different allowances like dearness, house-rent, over-time, shift etc. paid in cash or kind and other type of payments like canteen facility, health care facility, recreation club facility, etc. some of which are normally paid in kind. Further, employer's contribution to ESIC fund, provident fund, and other social security benefits, etc. are also considered as part of compensation.

3.17.2 As per Statement 41, annual emoluments paid, on average, to a hired worker has been Rs. 1,24,842 during ASUSE 2022-23. The emoluments paid per hired worker annually in those HWEs is more in urban area (Rs. 1,34,882) than rural area (Rs. 1,03,689). Among the different BACs, 'other services' has been the most remunerative for hired workers (engaged in HWEs) across all the sectors, generating Rs. 1,11,448, Rs. 1,46,069 and Rs. 1,34,732 for rural, urban and combined respectively.

3.17.3 Among the activity categories, as evident from Statement 42, ‘manufacture of other transport equipment’ (M22) has paid the most emoluments per hired worker at rural and at all-India level during ASUSE 2022-23. In urban sector, ‘manufacture of tobacco products’ (M4) has reported maximum income to the hired workers. On the other hand, ‘wholesale and retail trade of motor vehicles and motor cycles’ (T1) in trade and ‘other financial activities’ (S9) in other services have generated the maximum emoluments per hired worker during ASUSE 2022-23.

3.17.4 Statement 43, given below, provides the scenario of top 3 major states in providing the maximum annual emoluments per hired worker in case of HWEs across BAC and sector. The same is complemented by the pictorial highlight in Figure 7. Telangana comes out to be the most remunerative State among the major ones for the hired workers for manufacturing, other service activities with per hired worker annual emoluments to the tune of Rs. 1,56,775 and 2,02,502 respectively during ASUSE 2022-23. It has also led Telangana to be at the top with most annual emoluments of Rs. 1,78,029 per hired worker not only at all-India combined level but also separately for both rural and urban sector. In case of trading activities, Kerala is seen to be at the top with an average annual emoluments of Rs. 1,59,984 per hired worker. Among the remaining major states, Haryana, Delhi, Andhra Pradesh, Maharashtra, etc. have found themselves in top 3 when observed by sector or BAC level.

3.18 Fixed Assets per Establishment

3.18.1 Role of assets, particularly fixed assets, is vital in any production process generating goods and/or services. The case of unincorporated sector is of no exception. In the absence of proper records in most of the cases, it is often a challenging task to capture market price of various fixed assets such as building, plant & machinery, transport equipment, furniture & fixture, software & database, ICT equipment, tools etc. used for entrepreneurial purpose in ASUSE survey. Now, the establishments may own or hire fixed

assets for carrying out their economic activities. This section is devoted to owned fixed assets only. However, detailed tables are included in Appendix A for hired fixed assets also.

3.18.2 Value figures presented in this report for fixed assets are based on market values. Statement 44 provides the figures on owned fixed assets per establishment for each BAC across different sector and establishment type. This shows that, unincorporated establishments, on average, have owned Rs. 3,18,144 worth of fixed assets per establishment during ASUSE 2022-23. As one can expect, the fixed assets per establishment for HWEs has come out to be much higher at Rs. 11,35,171 when compared to the OAEs which stands at Rs. 1,74,688.

3.18.3 Statement 45R, 45U and 45All present the top 3 activity categories with most valuation of owned fixed assets per establishment, under each BAC and for each sector and establishment type. Activities like ‘accommodation’ (S1) (Rs. 60,817,24), ‘warehousing and storage’ (S5) (Rs. 46,13,754) that require good amount of fixed assets for their basic operation have been found at the top at all-India level. The toppers for this indicator in rural and urban area are S5 (Rs. 52,91,531) and S1 (Rs. 64,03,119) respectively.

3.18.4 Finally, the top 3 major states in terms of owning fixed assets per establishment are reflected in Statements 46R, 46U and 46All. It reveals that Maharashtra (Rs. 7,15,253), Gujarat (Rs. 5,58,063) and Jammu & Kashmir (Rs. 5,21,178) have been the top 3 states among the major states to have owned the most fixed assets per establishment pertaining to the unincorporated non-agricultural sector in the whole country during ASUSE 2022-23. Other than these major states, Haryana, Delhi and Punjab in rural and Jammu & Kashmir in urban have shown significant amount of owned fixed assets per establishment for the period October, 2022 to September, 2023.

3.19 Outstanding Loans per Establishment

3.19.1 Any entrepreneurial activity requires financial capital both for asset formation and for day to day activities. In order to have the requisite financial capital, the establishments generally avail loans from different institutions and individuals. The same applies for establishments in unincorporated sector also. However, it may be very challenging for unincorporated establishments, particularly the OAEs (which has happened to be the majority during ASUSE 2022-23), to avail loans from different institutions.

3.19.2 Statement 47 gives the BAC wise outstanding loan per establishment by sector and establishment type. Outstanding loan per establishment, on average, appears to be Rs. 50,138 at all-India level as per ASUSE 2022-23. A notable fact is that, outstanding loan per establishment for HWEs (Rs. 2,40,651) is nearly 5-times higher than the corresponding all-India figure. Among the BACs, the establishments engaged in 'other services' have reported the highest value of outstanding loans per establishment (Rs. 69,406) followed by trade (Rs. 46,469) and manufacturing (Rs. 28,153).

3.19.3 The top 3 major states having maximum outstanding loans per establishment have been given by BAC and establishment type for the different sectors separately at Statements 48R, 48U and 48All. A close look at these statements reveal that, overall Kerala (Rs. 1,64,826), Andhra Pradesh (93,920) and Jammu & Kashmir (89,998) are the states among the major ones which reported the maximum outstanding loan per establishment during ASUSE 2022-23. BAC-wise, Punjab in manufacturing, Kerala in trading and Andhra Pradesh in other services are at the top with outstanding loan of worth Rs. 2,82,317, 3,60,288 and 1,72,635 respectively per establishment.

3.20 Relative Standard Error (RSE)

3.20.1 Relative Standard Error (RSE) is a very useful indicator about the reliability of estimates generated from any sample survey. In case of ASUSE 2022-22, RSEs are generated for a number of important parameters both for aggregate and ratio. The RSEs for this survey are based on all the surveyed units excluding the out of coverage establishments which are very few in number.

3.20.2 The RSEs of estimated number of establishments, workers, GVA per worker (for market establishments) and GVA per establishments (market establishments) for the major State/UTs is presented in Statement 49. The estimates of RSE of 'estimated number of establishment', 'worker', 'GVA per worker', 'GVA per establishment' at all-India level, combining both rural and urban areas comprising of all activities are found to be 2.21%, 1.82%, 1.74%, and 2.14%, respectively. Further, the estimates of RSEs for different major States in rural and urban areas, as presented in Statement 49, seems to be reasonable.

3.21 Comparison of ASUSE 2022-23 with ASUSE 2021-22

3.21.1 It may be very important to observe the changes in the key indicators in ASUSE 2022-23 (October, 2022 – September, 2023) as compared to ASUSE 2021-22 (April, 2021 – March, 2022). Statement 50 is given below to display the growth in key aggregate indicators of number of establishments and number of workers. It shows that the estimated number of establishments and estimated number of workers have grown annually by 5.88% and 7.84% respectively during the period October, 2022 – September, 2023 in comparison to April, 2021 – March, 2022. Note: Figures in the parentheses in columns (5), (6) and (7) give the Compounded Annual Growth Rate (CAGR) of ASUSE 2022-23 (October, 2022 – September, 2023) over ASUSE 2021-22 (April, 2021 – March, 2022)

3.21.2 This growth scenario in estimated number of establishments and estimated number of workers is also observed across the sectors (rural/urban) and broad activity categories (manufacturing, trade and other services). 3.21.3 Further, the estimates of key aggregate indicators at Broad Activity Category Level (BAC) i.e. manufacturing, trade and other services, along-with annualized growth rates are presented in Statement 51. In this table, 'M', 'T' and 'S' respectively stand for manufacturing, trade and other services. It is observed that 'other services' have witnessed maximum annualized growth to the tune of 15.12% and 13.42% respectively, followed by manufacturing (2.22% and 6.34%) and trade (0.22% and 3.87%) in regard to estimated number of establishments and workers respectively.

3.21.4 Finally Statement 52 shows the changes in ASUSE 2022-23 over ASUSE 2021-22 in respect of some key ratio indicators.

Statement 52: Key indicators of ASUSE 2021-22 and ASUSE 2022-23

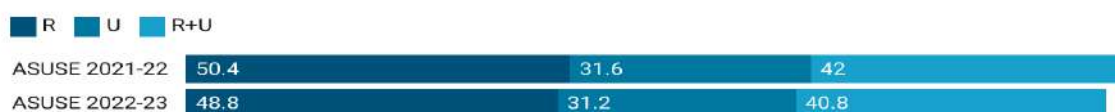

Indicator	ASUSE 2022-23 (October,2022 – September, 2023)	ASUSE 2021-22 (April, 2021 – March,2022)

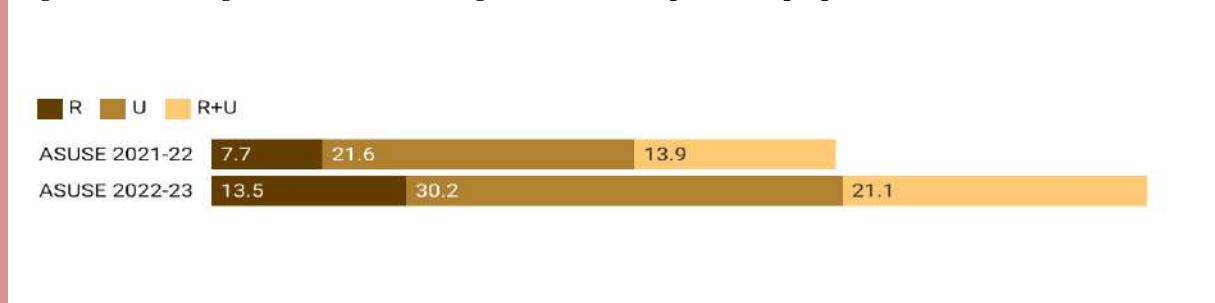

Figure 8: Percentage of establishments located inside household premise

Note on Sampling Design and Estimation Procedure

1.1. **Introduction:** National Sample Statistical Office (NSSO) of India conducted Annual Survey on Unincorporated Sector Enterprises (ASUSE) 2022-23 during October 2022 to September 2023. This survey was devoted exclusively to economic and operational characteristics of unincorporated non-agricultural establishments in manufacturing, trade and other services sector. The unit of enquiry of the ASUSE was ‘establishment’.

1.2. Period of survey and work programme:

1.2.1 The period of ASUSE 2022-23 was from 1st October 2022 to 30th September 2023. The survey period of ASUSE 2022-23 was divided into four sub-rounds of three months’ duration:

sub-round 1 :	October – December 2022
sub-round 2 :	January – March 2023
sub-round 3 :	April - June 2023
sub-round 4 :	July – September 2023

1.2.2. In each of these sub-rounds, a number of sample first stage units (FSUs) i.e. villages/ blocks were allotted for survey. The distribution of FSUs over the sub-rounds was not necessarily the same. Attempt was made to survey each of the FSUs during the sub-round to which it was allotted. *Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, Ladakh and rural areas of Arunachal Pradesh and Nagaland.*

1.3. **Schedules of enquiry:** During this round, the following schedules of enquiry were canvassed:

Schedule LSU	: list of households and non-agricultural establishments
Schedule ESU	: establishment schedule

1.4. Sample Design

1.4.1. **Outline of sample design:** A stratified multi-stage sampling design was adopted for ASUSE.

Rural sector: The first stage units (FSU) were the census villages in the rural sector. For rural part of Kerala, Panchayat wards (PW) was taken as FSUs.

Urban sector: The First Stage Units (FSU) were the latest updated UFS (Urban Frame Survey) blocks.

The Ultimate Stage Units (USU) were establishments for both the sectors. In the case of large FSUs, one intermediate stage of sampling was the selection of three hamlet-groups (HG)/sub-blocks (SBs) from each of the large FSUs.

1.4.2. Sampling frame used for selection of FSUs

Census 2011 list of villages was used as the sampling frame for **rural areas**. Auxiliary information such as number of workers, etc. available from Sixth Economic Census (EC) frame was used for stratification, sub-stratification and selection of FSUs, for rural areas (except Kerala). In **rural areas of Kerala**, list of Panchayat Wards (PW) as per Census 2011 was used as sampling frame. For **all urban areas**, the latest updated list of UFS blocks was the sampling frame.

1.4.3. Stratification of FSUs:

Rural sector: Each NSS State region constituted a rural stratum.

Urban sector: In urban areas, strata were formed within each NSS State region on the basis of population of towns as per Census 2011. The tentative stratum numbers and their composition (within each NSS State region) were as follows:

stratum 1 :	all towns with population less than 50,000
stratum 2 :	all towns with population 50,000 or more but less than 3 lakhs
stratum 3 :	all towns with population 3 lakhs or more but less than 10 lakhs
stratum 4, 5, 6, ... :	each city with population 10 lakhs or more

1.4.4 Sub-stratification of FSUs:

1.4.4.1 Rural sector (Except Kerala)

1.4.4.1.1 Because of very small population sizes, **no sub-stratum** was formed in the rural sector of five NSS regions, namely, Chandigarh (041), Delhi (071), Daman & Diu and Dadra & Nagar Haveli (251), Lakshadweep (311) and Puducherry (341).

1.4.4.1.2 In each of other NSS regions, firstly, all the villages with zero worker comprised of a sub-stratum (say, '*zero sub-stratum*') within each stratum (i.e., NSS region), wherever available.

1.4.4.1.3 Then, for the remaining part of the stratum, principle of demarcating more number of sub-strata with higher variation was adopted. For this purpose, variability in number of workers in a stratum (i.e. NSS region) was accounted by computing coefficient of variation (CV) of the workers belonging to it. Primarily, the Sixth EC non-agricultural worker figures were considered

as stratification variable. In absence of the 6th EC worker, census non-agricultural worker figures were considered.

1.4.4.1.4 Five ‘*non-zero sub-strata*’ (i.e., number of workers is positive) were demarcated where CV of worker in a stratum is less than or equal to 2; 7 ‘*non-zero sub-strata*’ were demarcated where CV of worker in a stratum is more than 2 but less than or equal to 3, and 9 ‘*non-zero sub-strata*’ were demarcated where CV of worker in a stratum is more than 3.

1.4.4.1.5 The ‘*non-zero sub-strata*’, as mentioned above, within each stratum were formed by equalizing total worker size of the sub-stratum. In other words, the ‘*non-zero sub-strata*’ within each stratum were formed in such a way that each of the sub-stratum possessed more or less equal no. of workers and the variance of workers within each sub-stratum in a stratum was minimum.

1.4.4.2 Rural sector (Kerala)

1.4.4.2.1 Five sub-strata were formed of Panchayat Wards(PWs) within each stratum (i.e., NSS regions) by forming five quintile groups of population within the stratum. Thus, each sub-stratum contained about 20% of population of stratum and the variance of population in each sub-stratum within a stratum is minimum.

1.4.4.3 Urban Sector:

1.4.4.3.1 For each stratum, there were two sub-strata based on the information as available from the latest available UFS blocks as follows:

sub-stratum 1: UFS blocks identified as Bazaar area (BA)/ Industrial area (IA)/ Hospital area (HA)/ Slum area (SA) which are likely to contain relatively higher number of establishments.

sub-stratum 2: remaining UFS blocks of the stratum

1.4.5 Allocation of FSUs:

1.4.5.1 **Total sample size (FSUs):**A total of 16,497 FSUs (8,568 in rural and 7,929 in urban) have been selected for ASUSE 2022-23.

1.4.5.2 **Allocation of total sample to States and UTs:** All-India sample size (FSUs) were allocated to different State/UTs in proportion to total number of non-agricultural workers under coverage as per EC-6. Total allocation and number of FSUs surveyed in earlier rounds were also taken into consideration.

1.4.5.3 **Allocation of State/UT level sample to rural and urban sectors:** State/UT sample sizes were allocated to rural and urban sectors of the State/UT in proportion to number of non-agricultural workers under coverage as per EC-6.

1.4.5.4 Allocation to strata: Stratum allocations of State/UT for each sector were made in proportion to number of non-agricultural workers under coverage as per EC-6 subject to the condition that each stratum has at least four FSUs allocated. In fact, because of the resource constraints of NSSO (FOD), allocations made at NSS region level during the last round of ASUSE were inherited with certain adjustments. Attempt has been made to distribute the allocation at stratum level into sub-stratum level following the procedure mentioned in paragraphs and sub-paragraphs under 1.4.4.1 and 1.4.4.2 which would have led to approximate optimization.

1.4.5.5 Allocation to sub-strata

1.4.5.5.1 Rural sector (except Kerala): Four (4) FSUs were mandatorily allocated to ‘*zero sub-stratum*’ irrespective of its size. The given allocation of a stratum (NSS region) minus the allocation made to the zero sub-stratum (i.e. 4) were adjusted to the nearest multiple of 5 or 7 or 9 depending on the number of non-zero sub-strata formed in that stratum to make it divisible by 5 or 7 or 9. Then equal allocation was made to each of the non-zero sub-stratum to ensure that the principle of approximate optimum allocation is followed. In a few cases, following the above procedure, it is possible to have the size of the sub-stratum less than the allocation. However, in no case the allocation exceeded more than eighty percent of the sub-stratum size.

1.4.5.5.2 Rural sector (of Kerala): The given allocation of a stratum (NSS region) was adjusted to the nearest multiple of 5 to make it divisible by 5. Then equal allocation was made among the sub-stratum to ensure that the principle of approximate optimum allocation is followed.

1.4.5.5.3 Urban sector: Allocation was at least 4 for each sub-stratum in the urban sector. However, the restrictions might have been waived in special cases, especially in the States of North Eastern Region, if required.

1.4.6 Selection of FSUs:

From each stratum/sub-stratum, required number of sample FSUs were selected by SRSWOR scheme. The selected FSUs from each of the sub-stratum were allocated to four sub-rounds equally as far as possible.

Estimation Procedure

1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

i = subscript for i-th FSU [village/ block]

d = subscript for a segment (d = 1, 2, 9) [sometimes, 'd' is not mentioned in the formulae, instead value of d, i.e., '1', '2' or '9' is mentioned in the formulae]

j = subscript for j-th second stage stratum in an FSU/ segment (i.e., j=1, 2, 3 , 18)

k = subscript for k-th sample establishment under a particular second stage stratum within an FSU/ segment

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

$= (D - 1)/2$ for FSUs with $D > 1$

N = total number of FSUs in any rural/urban sub-stratum

n = number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-stratum

E = total number of establishments listed in a second-stage stratum of an FSU / segment of sample FSU

e = number of establishments surveyed in a second-stage stratum of an FSU / segment of sample FSU (excluding casualty establishments)

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

Y_{stidjk} = observed value of the characteristic y for the k-th establishment in the j-th second stage stratum of the d-th segment (d = 1, 2, 9) of the i-th FSU belonging to the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

2 Formulae for Estimation of Aggregates for a particular stratum × sub-stratum:

2.1 Schedule LSU:

2.1.1 Rural/Urban:

(i) For estimating the number of establishments in a stratum × sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \left[y_{i9} + y_{i1} + D_i^* \times y_{i2} \right]$$

where y_{i9} , y_{i1} , y_{i2} are the total number of establishments possessing the characteristic y in segments 9, 1 & 2 of the i -th FSU respectively.

2.2 Schedule ESU:

2.2.1 Rural/Urban:

Estimation formula for a sub-stratum of a State/UT:

(i) For establishments selected in j^{th} second stage stratum in the i^{th} FSU belonging to t^{th} substratum under s^{th} stratum:

$$\hat{Y}_{ij} = \frac{N_{st}}{n_{st}} \sum_{i=1}^{n_j} \left[\frac{E_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected establishments, the estimate of characteristic y for t^{th} substratum under s^{th} stratum is:

$$\hat{Y} = \sum_i \sum_j \hat{Y}_{ij}$$

This \hat{Y} may be viewed as \hat{Y}_{st} .

3 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum (\hat{Y}_s) is obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

5 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as $\hat{R} = \frac{\hat{Y}}{\hat{X}}$.

6 Estimation of Errors:

6.1 Formula for estimated variance (for Rural/Urban):

6.1.1 The sampling scheme in ASUSE is SRSWOR. However, if the sampling fraction is small, then the difference between variance estimates using the SRSWR and SRSWOR becomes negligible. In such case, samples can be treated as drawn with SRSWR and variance estimates becomes simpler in form and easy to calculate. It has been observed that overall sampling

fraction is quite low in the current situation and hence there is not much loss in accuracy of variance estimates if SRSWR is assumed.

With this view, formulae for estimates of variances are given below based on SRSWR scheme.

(a) **Formula for aggregate \hat{Y} (for Rural/Urban):**

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s) = \sum_s \sum_t V\hat{a}r(\hat{Y}_{st})$$

$$V\hat{a}r(\hat{Y}_{st}) = \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} (N_{st}\hat{Y}_{sti} - \hat{Y}_{st})^2$$

(b) **Formula for ratio \hat{R} (for Rural/Urban):**

$$M\hat{S}E(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t M\hat{S}E_{st}(\hat{R})$$

$$M\hat{S}E_{st}(\hat{R}) = \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} [N_{st}(\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st})]^2,$$

where $N_{st}\hat{Y}_{sti} = \sum_j \sum_k y_{stijk} \times n_{st} \times multiplier,$

$$N_{st}\hat{X}_{sti} = \sum_j \sum_k x_{stijk} \times n_{st} \times multiplier$$

in the formula in (a) and (b) above.

Multiplier is as given in the table in para 7.

6.2 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

7. Multipliers:

The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a schedule type are given below:

sch type	sector	formula for multipliers		
		segment 9	segment 1	segment 2
LSU	rural/urban	$\frac{N_{st}}{n_{st}}$	$\frac{N_{st}}{n_{st}}$	$\frac{N_{st}}{n_{st}} \times D_{sti}^*$
ESU		$\frac{N_{st}}{n_{stj}} \times \frac{E_{sti9j}}{e_{sti9j}}$	$\frac{N_{st}}{n_{stj}} \times \frac{E_{sti1j}}{e_{sti1j}}$	$\frac{N_{st}}{n_{stj}} \times D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}}$
$j = 1, 2, 3, \dots, 18$				

Multipliers were computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

7.1 Adjustment of multipliers due to status of the establishment as ‘out of coverage’

Let

E = total number of establishment for a Second Stage Stratum (SSS)

e = total number of surveyed sample establishment for an SSS

m = total number of sample surveyed establishment out of coverage for an SSS

Then

(i) Proportion of sample establishment out of coverage = m/e in an SSS

(ii) Estimated number of establishment out of coverage = E*m/e in an SSS

Adjustments were done in the following manner:

(i) Adjusted number of establishment within the coverage = (E - E*m/e) in an SSS

(ii) Adjusted number of sample establishment within the coverage = (e-m)

Thus, in such situation, E in the multiplier in para 5 above was replaced by $E * (1 - m/e)$ and e was replaced by $(e - m)$.

8. Treatment for zero cases, casualty cases etc.:

8.1 While counting the number of FSUs surveyed (n_{st}) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in schedule LSU was considered.

8.2 However, if establishments were available in the frame of the FSU but none of these could be surveyed then that FSU was treated as casualty.

8.3 *Casualty cases*: FSUs with survey code 7 as per schedule LSU were treated as casualties.

8.4 *All the FSUs with survey codes 1 to 6 as per schedule LSU minus the number of casualties as identified in 8.3 were taken as the number of surveyed FSUs (n_{st}) for that (stratum/sub-stratum).*

9. Treatment in cases of void second-stage strata/sub-strata /strata

9.1 A stratum/sub-stratum may be void because of the casualty of all the FSUs belonging to the stratum/sub-stratum.

9.2 When a stratum/sub-stratum is void, the following procedure is recommended:

Case (I): Stratum/Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

- (i) If a rural/urban sub-stratum is void then it was merged with the other similar sub-stratum of the same stratum.
- (ii) If a complete rural/urban stratum is void due to all FSUs being casualty, it was excluded from the coverage of the survey. The state level estimates was based on the estimates of regions for which estimates were available and remarks to that effect were added in appropriate places.

Case (II): Void case at second stage stratum level:

If due to some reason no establishment could be surveyed (i.e., all ssu's are casualties in a second stage stratum of an FSU, i.e., $e_{jk}=0$) even though there were establishments listed (i.e.

$E_{jk} > 0$), which is known as ‘void’ second stage stratum. Then that second stage stratum was merged with another non-void second stage stratum. Initially, it was checked whether the same void SSS was available in other segment (1 or 2) of the same FSU and was merged with it. Now, in case void SSS is observed even after considering both segments 1 and 2 of that FSU, then that void SSS was merged with another non-void SSS of that same FSU; and the principle and order of “second stage stratum merging” are as follows:

SSS found void	Merging order of SSS
1	2, 3
2	1, 3
3	1, 2
4	5, 6, 7, 13
5	4, 6, 7, 13
6	4, 5, 7, 13
7	4, 5, 6, 13
8	14
9	10, 11, 12, 15, 16, 17, 18
10	9, 11, 12, 16, 15, 17, 18
11	9, 10, 12, 17, 15, 16, 18
12	9, 10, 11, 18, 15, 16, 17
13	Maximum of Cap E (SSSs 4, 5, 6, 7)
14	8
15	16, 17, 18
16	15, 17, 18
17	15, 16, 18
18	15, 16, 17

Similarly, for segment 9, any void SSS to be merged with another non-void SSS in that segment 9 of that same FSU, the above SSS merging procedure was followed.
