

# India records highest ever single day recoveries of 51,706

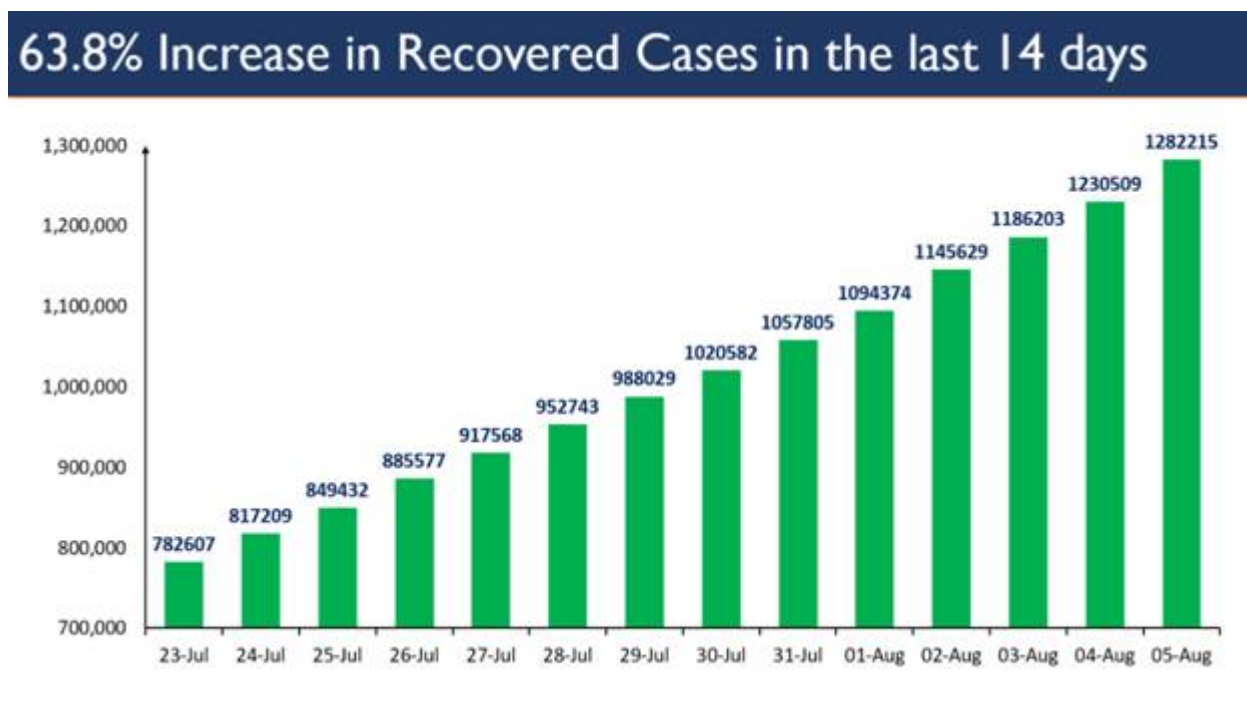

## Recovery Rate reaches a record high of 67.19%

## Case Fatality Rate (CFR) further dips to 2.09%

Posted On: 05 AUG 2020 2:47PM by PIB Delhi

India has recorded the highest ever single day recoveries in the last 24 hours. With a sharp increase of 51,706 COVID-19 patients recovering, the recovery rate has reached a new high of 67.19% and continues to improve each day. The recoveries till now total up to 12,82,215, more than twice the active cases.

With increasing number of COVID-19 patients recovering, there has been a 63.8% increase in recovered cases in the last 14 days, indicating that the COVID-19 response and management driven by the Centre's "TEST, TRACK, TREAT" strategy is yielding the desired results.

The aggressive testing along with ramped up hospital infrastructure by collective efforts of the public and private sectors has ensured the increasing Recovery Rate which has improved from 63% to 67% in the last 14 days.

## Recovery Rate in the last 14 days gone up from 63% to 67%

With such consistent increase in recoveries, the gap between recovered patients and active COVID-19 cases has reached nearly 7 lakh. Due to the record highest daily recoveries, the active cases have reduced to 5,86,244 (less than 5,86,298 recorded yesterday) and all are under medical supervision.

Coordinated implementation of “Test, Track, Treat” strategy by the Union and State/UT governments has ensured that the CFR has been low when compared to the global scenario and it has been progressively falling. The Case Fatality Rate stands at 2.09% today.
